

2010 Jeep[®]
Liberty

Purpose built.

Whether you're out on the trail or heading to the big city, the 2010 Jeep® Liberty is built to deliver. It keeps you going with world-class Jeep brand capability that's paired with a very long list of standard and available premium features. Its athletic stance and game-for-it attitude make Liberty a vehicle that's at home in any setting.

Choose from two Liberty models, the playful Sport and the well-appointed Limited. Then take it from there. Outfit Liberty with innovative features like a Media Center 730N radio with GPS navigation, our exclusive Sky Slider™ roof, or Selec-Trac® II full-time four-wheel-drive, to name just a few. Head out with purpose, and build from there. This is how you enjoy living the Jeep life and everything it has to offer.

How a trademark becomes a benchmark.

At the heart of the 2010 Jeep® Liberty lies a powertrain that puts less capable class rivals to shame. Liberty's available four-wheel-drive system, Selec-Trac® II, is the most advanced system in its class⁽¹⁾ due to its unmitigated strength and real-time traction response. Selec-Trac II is constantly adjusting to driving conditions to produce optimum grip on the road at all times. Should traction loss occur, Selec-Trac II immediately blasts the lion's share of torque onto the wheels with the most grip.

You'll get more pull when the going gets tough with Liberty's standard 3.7L V6 engine. It produces a robust 210 hp and 235 lb-ft of torque at 4,000 rpm, with a generous dose of power at the engine's low end that helps generate strong take-off power, especially noticeable in towing situations.

The standard Hill Start Assist (HSA) fights vehicle rollback to eliminate the need for two-footed driving in many off-road situations. The available Hill Descent Control (HDC) is active in 4LO when the HDC button is depressed. It mimics the mighty Wrangler Rubicon's 4LO crawl ratio using automatic braking, allowing the driver to smoothly descend hills in a slow and controlled manner.

⁽¹⁾Based on the *Automotive News* segmentation.

JEEP TRAIL RATED® vehicles are designed to perform in a variety of off-road conditions. Five performance categories outline the superior capabilities that all Trail Rated vehicles share.

ARTICULATION

A Trail Rated suspension system is limber like a gymnast. How exactly? Flexibility is the key to good articulation. The more a wheel can travel and suspension flex, the better it can maintain contact with terra firma and provide the traction needed to cross an array of obstacles.

TRACTION

The vehicle maintains forward momentum through the tires staying in contact with the road or trail. Trail Rated traction helps you stay in control on untamed terrain, slippery (wet, mud, snow) conditions, and on steep grades.

MANEUVERABILITY

Athletic. Agile. Trail Rated. Jeep 4WD vehicles have the footwork to help navigate narrow gaps, dodge emergency situations, and avoid cosmetic damage to the underbody, thanks to precision steering and optimized wheelbases.

GROUND CLEARANCE

Help keep your belly out of the mud. Clear nasty logs, rocks and uneven ground while helping to prevent undercarriage damage. Trail Rated vehicles feature optimized approach, departure, and breakover angles to keep you in the clear.

WATER FORDING⁽¹⁾

Hit that riverbed with confidence. A Trail Rated Jeep vehicle features additional electrical and body sealing, along with a high air intake location for optimum water fording capability.

⁽¹⁾Do not attempt water fording unless depth is known to be less than 20 inches. Traversing water can cause damage that may not be covered by the new vehicle warranty. Always off-road responsibly in approved areas.

Happiest with **room to move.**

Safety first.

★ ★ ★ ★ ★
FIVE-STAR

HIGHEST GOVERNMENT
FRONT & SIDE CRASH RATING

Jeep® Liberty has received the highest marks — Five Stars — during front and side crash tests conducted as part of the U.S. Department of Transportation's SaferCar.gov program.⁽¹⁾ You can head out with confidence, knowing you're outfitted with a comprehensive set of safety and security features.

The air bag⁽²⁾ system includes side-curtain and advanced multistage driver and front-passenger air bags. Liberty's Electronic Stability Control (ESC)⁽³⁾ integrates a four-wheel antilock brake system (ABS), all-speed traction control, a Brake Assist system that automatically helps provide quicker braking power in emergency situations, and Electronic Roll Mitigation (ERM) that can apply appropriate braking to necessary wheels when sharp steering actions and/or impending wheel lift is detected.

The available Trailer Sway Control (TSC), illustrated at right, works in tandem with ESC to help improve handling in adverse towing conditions caused by crosswinds and traffic. Front-seat active head restraints⁽⁴⁾ move forward and upward in the event of a rear-end-collision to decrease the space between the headrest and occupant's head, thereby helping to reduce the chance of injury — a new standard safety feature.

⁽¹⁾Star ratings are part of the U.S. Department of Transportation's SaferCar.gov program (safercar.gov). ⁽²⁾The Advanced Front Air Bags in this vehicle are certified to the new Federal regulations for advanced air bags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly. ⁽³⁾No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. ⁽⁴⁾Always sit properly with the head restraint properly adjusted. Never place anything in front of the head restraint.

Beat inflation issues.

Liberty's standard Tire Pressure Monitoring Systems continuously monitor the pressure in the tires and will immediately notify the driver when levels drop below the minimum acceptable level.

Air bags shown deployed for illustrative purposes only.

Sky-high tech.

With Uconnect™, you're always connected — to people, places, music, movies, and the Internet.

Voice Command. Lets you select radio stations, satellite radio channels,⁽¹⁾ and navigation⁽¹⁾ destinations using voice commands. Works with all Uconnect Media Center radios. Included with Uconnect Phone.

Uconnect Phone. Lets you talk on your Bluetooth® compatible phone virtually hands-free. Address Sync⁽²⁾ lets you call anyone in your address book by saying their name.

Audio Jack. Connect a 3.5-mm audio cable from your MP3 player, phone, or electronic book reader to play audio through your car's speakers.

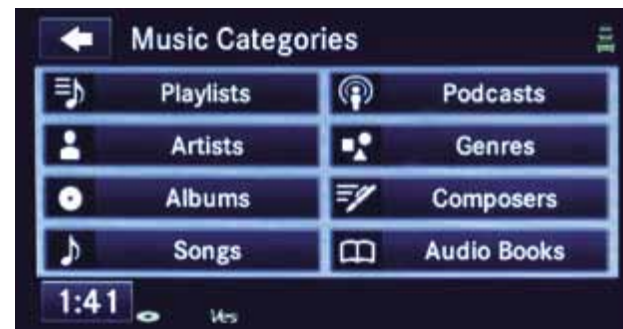

Media Center 730N AM/FM/CD/DVD⁽³⁾ Radio with 30GB Hard Drive and GPS

Navigation. 6.5-inch touch screen, MP3/WMA support, USB input, 4,250 song capacity, SIRIUS® Satellite Radio,⁽⁴⁾ SIRIUS Traffic,⁽⁵⁾ and Voice Command.

iPod® Control. Connect most iPod-compatible devices to your car's stereo using the in-car cable; then control them with your radio or steering wheel controls. Keeps the devices charged too. iPod Control is an Authentic Jeep® Accessory by Mopar.

Uconnect Web.⁽⁶⁾ An in-car router that connects any Wi-Fi-enabled device to the Internet at 3G broadband speeds, allowing multiple passengers to surf the Web and social networks, look up directions, check eMail, or download music. Uconnect Web is an Authentic Jeep Accessory by Mopar. Subscription required, sold separately.

⁽¹⁾When satellite radio and navigation features are equipped on your vehicle. Any voice-commanded system should be used only in safe driving conditions and all attention should be kept on the roadway ahead. Failure to do so may result in an accident causing serious injury or death. ⁽²⁾Phone must support Bluetooth Phone Book Access Profile (PBAP) ⁽³⁾In-dash DVD capability not available in all states. See your dealer for details. ⁽⁴⁾SIRIUS service available only in contiguous United States and D.C. Service available in Canada; see siriuscanada.ca. Subscription required after 12-month subscription included with vehicle purchase. Subscriptions governed by SIRIUS Terms & Conditions available at sirius.com. SIRIUS, XM, and all related marks and logos are trademarks of SIRIUS XM Radio Inc. and its subsidiaries. ⁽⁶⁾The Uconnect Web feature is not intended for use by the driver while the vehicle is in motion.

Journey into the interior.

Choose the road best-traveled. The 2010 Jeep® Liberty offers more comfort and convenience features and flexible seating and cargo options than any other vehicle in its class.⁽¹⁾ Cargo capacity is functionally fun, providing 25.2 cu ft with the rear seat up and expanding to a maximum 60.9 cu ft with Liberty's 60/40 split-folding rear seats moved to the "down" position. Liberty Limited is loaded with premium standard features, including a plush leather-trimmed interior, heated driver and front-passenger seats, and nine ∞Infinity® speakers with a 368-watt amplifier including a subwoofer. When paired with the optional Media Center 730N navigation radio, you have a world-class voice-activated communication center with touch-screen capability and real-time traffic updates via SIRIUS® Satellite Radio.

Liberty Sport's new and standard air filtration system can filter out particles down to 10 microns in size, like pollen, mold spores and dust, to help keep micro allergens at bay.

⁽¹⁾Based on *Automotive News* segmentation.

The little details make a big difference.

A standard fold-flat front passenger seat creates a handy table-like surface. Liberty's flexible interior works with you to allow configurations that accommodate gear, people, and pets.

Properly secure all cargo.

Jeep® Liberty Limited leather-trimmed interior shown in Dark Slate Gray.

Traction speaks louder than words.

Jeep® Liberty plays the strong and silent type to perfection, looking every part the hero with its recognizable Jeep brand seven-slot grille and aggressive profile. A long wheelbase and wide track give Liberty sure footing and its exceptional road manners are helped by a Short-Long-Arm (SLA) independent front suspension, a solid axle five-link rear suspension, and power rack-and-pinion steering. The standard and extremely capable 210-hp 3.7L V6 engine is enhanced with Electronic Throttle Control (ETC) and can be matched to the available Trail Rated® Selec-Trac® II for full-time 4WD action and the power to tow up to 5,000 lb.

Liberty Limited adds attention-getting chrome to the grille, bodyside molding, standard roof rack, side rails and liftgate. The available ParkSense® Rear Park Assist System⁽¹⁾ uses sound waves to detect nearby obstacles in and near the rear path of the vehicle to help maneuver tight spaces at parking speeds. Liberty Sport conveniently includes standard power, heated, manual folding mirrors.

Both Limited and Sport models include the smart and safe Sentry Key® anti-theft engine immobilizer that virtually eliminates a thief's ability to start the engine without the encoded key.

⁽¹⁾Always check entire surroundings before backing up.

Big, bold, open-air Sky Slider™

Step into a 2010 Jeep® Liberty equipped with the industry-exclusive Sky Slider full-length, fully retractable roof and you and your passengers will get a wide-screen view of the world like no other. With one simple touch of a button, the optional Sky Slider roof automatically retracts to give you that special one-of-a-kind Jeep brand open-air ride. Liberty's innovative Sky Slider roof has the largest opening in its class⁽¹⁾ with a 255 percent (3.5 times) larger opening than the competition. An anti-trap safety system immediately sends the Sky Slider roof into auto-reverse if an obstacle is detected during operation. The Sky Slider roof opens front to back exposing both rows of seating, and back to front revealing only the second row, or any position in between. The roof is integrated into the vehicle's body via a reinforced safety cage-like frame consisting of 10 lightweight aluminum crossbars that help maintain structural integrity and add an element of protection. The reinforced nylon fabric nests into a specially designed weather-strip seal that virtually eliminates wind noise when closed. Fully tested and approved by professional mud-, snow-, and slush-splashers.
